

Easter - Project Ideas

Science:

Follow this link to make your own fizzy dyed eggs - an experiment and egg decoration in one!

<https://littlebinsforlittlehands.com/dying-eggs-with-vinegar/>

Cooking:

People often celebrate Easter by eating chocolate, buns and biscuits.

Try making a sweet treat with your family. Can you use Easter themed decorations?

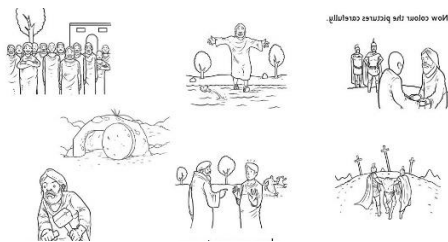

Writing:

Draw, decorate and write Easter cards to share with friends, family and neighbours so that you can celebrate Easter together, from a safe distance!

RE:

Learn about the Christian Easter Story. Can you remember the sequence of the key events? Can you retell the story to a family member, write it down or create a storyboard like below?

Science & Geography:

At Easter we often celebrate events that mark the beginning of Spring. Can you go on a Spring walk and find things that show the season we are in now? Which is your favourite season and why?

Art:

Create your own piece of seasonal art work (using any of your favourite art resources) to show the differences between the 4 seasons.
